Several people helped me with this book. First, I'd like to thank all the teachers and students who used *Take It Easy* and encouraged me to write another book on idioms.

The anonymous reviewers for Prentice Hall Regents were inspirational in their rigorous approach to the review process.

I am indebted to Susan Stempleski, Alison Rice, and Julie Falsetti, my colleagues at the International English Language Institute, for the models of communicative activities they developed in their book *Getting Together*. I would also like to acknowledge Gertrude Moskowitz's classic work, *Caring and Sharing in the Foreign Language Classroom*, as a fine reference for interactive activities.

For cheerfully field testing *What's Up?* when it wasn't fit to print and for sharing students' writing with me, I thank Kathryn Nikodem, another colleague at the Institute.

Victoria Henriquez turned very rough drafts into neatly typed pages and stayed with the project through multiple drafts. Joan Quintana cheerfully typed the final changes, under pressure, before publication.

Two ESL students at the Institute, Tony Piccolo and Enrique Ortega, drew my attention to the idiom "What's up?" which led to my choosing it as the title of this book.

My sister, Mary Ann McPartland, edited the reading selections, and Brenda White, my editor at Prentice Hall Regents, provided the right combination of patience and pressure to help me finish the book. Janet Johnston and Louisa Hellegers meticulously copyedited the manuscript.

Finally, I'd like to thank my friend Betsy Baiker for her constant encouragement and regular supply of comics while I was simultaneously writing this book and a doctoral dissertation.

T O T H E S T U D E N T

What's Up? is a book about idioms. In fact, "What's up?" is an idiom. An idiom is a group of words that has a special meaning. The meaning of the group of words is different from the meanings of the individual words together. For example, the group of words "What's up?" means "What's new?" or "What's happening?" The word "up" alone does not mean "new" or "happening," but when it's combined with "what's," it means "What's new?"

This doesn't mean that every group of words is an idiom. For example, "up the hill" is a group of words, but it doesn't have a special meaning. Each word has its ordinary meaning. In this example, "up" means the opposite of "down."

Many of the words used in idioms come from Old English or Middle English, ancestors of the English we use today. Their one-word equivalents often come from Latin or Greek. For example, the Old English words "turn down" mean "reject," a Latin word. Because so many of the words used in idioms are English in origin (not Latin or Greek), idioms are at the heart of the English language.

Although idioms often sound less formal than their one-word equivalents, this doesn't mean that idioms are slang or incorrect forms of English. Most idioms are standard forms of expression and are used in literature, magazine and newspaper articles, academic journals, speeches, and radio and television broadcasts, as well as in everyday speech.

By doing the exercises in this book, you will learn to understand and use seventy-three idioms. You will practice using idioms in reading, writing, speaking, and listening. You will not only learn the meaning of each idiom, you will also learn:

1. the subjects and objects that go with the idiom. For example "Judy called up her sister."
2. the words in the idiom that are stressed. For example, in "work on" only "work" is stressed, but in "work out" both words are stressed.

3. the position of pronoun objects. For example, you can say: "Judy called up her sister," or you can say: "Judy called her sister up." But if you use a pronoun, you must say: "Judy called her up." You can't say: "Judy called up her" unless you are contrasting "her" with someone else.
4. if the idiom is informal. For example, "polish off": "Victor polished off a hamburger and a soda in about one minute."

By doing the exercises and activities in What's Up? you will get a lot of practice with idioms in sentences, paragraphs, and stories. You will read sentences with idioms in them, write sentences with idioms, hear sentences with idioms, and say sentences with idioms. After you finish each chapter, you will have a good idea of how to use the idioms introduced in that chapter.

Of course, you won't know all the idioms in English (there are thousands of them), but you will know many idioms, and you will know how to learn more on your own. And the next time someone asks you "What's up?," you can tell that person: "I've been studying English idioms, and 'What's up?' is one of them!"

T O T H E T E A C H E R

What's Up? is a book of verbal idioms. Each chapter presents five to ten idioms related to a specific topic (such as family, sports, politics, and lifestyles) in a meaningful context, with follow-up exercises and activities to help learners develop syntactic and communicative competence in this important aspect of the English lexicon. The book contains ten chapters and two review sections.

The material is geared to **intermediate** ESL or EFL learners. The idioms are presented in reading selections about contemporary topics (such as illiteracy, dieting, and famous authors). The contexts appeal to both adult and young-adult learners.

What's Up? uses an inductive approach to the study of idioms. Learners read a story containing a number of idioms and then answer **comprehension, inference, and main idea** questions based on the contextualized presentation. Learners again use the context to determine the precise **meaning** of each idiom. But knowing the meaning of an idiom is not enough if a learner wants to develop fluency with idioms. The text therefore provides additional exercises in **selectional restrictions** (that is, the subjects and objects appropriate to each idiom), **prepositions** and **particles**, the **position of object pronouns**, as well as information on the **grammatical** and **stylistic characteristics** of certain idioms and the placement of **stress** in each idiom.

After learners have worked on exercises that draw attention to the **semantic** and **syntactic** properties of the idioms, they go on to exercises and activities that provide **listening comprehension** practice, writing practice, and **conversation** practice. In the course of each chapter, learners practice idioms through all four skills: **reading, writing, speaking, and listening**. The book does not contain mechanical drills that students can do by simply following a model. Instead, each exercise requires the learner to make hypotheses about the idioms, so the learner is gradually acquiring more and more information about the peculiarities of each idiom. The following is a list of the exercises and activities that appear in each chapter:

Warm-Up Exercise

Reading Exercises (Get the Picture? Comprehension; Get the Picture? Inferences; Get the Picture? Main Idea)

Meaning Exercises (Figure It Out; What Does It Go With?; Look It Up)

Grammar Exercises (Fill It In: Prepositions and Particles; Fill It In: Object Pronouns)

Listening Comprehension Exercise (Listen In)
Writing Exercise (Finish It Up)
Conversation Activities (Act It Out; Talk It Over)

What's Up? can be used for special classes in idioms, vocabulary, listening comprehension or conversation, or as an ancillary text for grammar, reading, or writing courses. Also, this material can be used in T.O.E.F.L. preparation courses because idioms are frequently incorporated in the listening comprehension section of the test, and the book may be used for self-study (an Answer Key is in the Appendix) and in a language lab.

The idioms are presented in reading, writing, speaking, and listening activities because idioms occur in all these aspects of American English. People commonly believe that idioms are limited to spoken English, but idioms are used in literature, newspaper articles, advertisements, business reports, and academic publications.

The idioms selected for this text are, for the most part, idioms that occur frequently. Although some are less formal than others ("go for," "polish off," and "root for," for example, are less formal than "come in contact with," "focus on," and "put into power"), the text contains no slang, because slang tends to become outdated quickly, and its use is limited mainly to informal, spoken English.

BY THE WAY . . .

This text is not meant to be an exhaustive treatment of idioms in English. It deals with verbal idioms exclusively, and only with seventy-three out of the more than 10,000 idioms that exist in the language. The point is not to teach learners to master every idiom in English, but to help them become conscious of idioms and learn how to use some of them. Because transitive phrasal verbs are separable (that is, an object can occur between the verb and particle, such as "The university turned his application for financial aid down"), learners who have not studied idioms aren't aware that the words "turn" and "down" have a special meaning, i.e., to "reject." After working through this text, learners should be able to notice the connections between verbs and particles and verbs and prepositions in the input they get from native speakers, and to continue to learn idioms when the course is over.

ABOUT THE EXERCISES

Warm-Up Exercise

This is loosely connected to the reading passage but is more personal in nature. It gives students a chance to get to know each other, and should lead to a positive classroom atmosphere while introducing students to the theme of the chapter.

Reading Exercises

These exercises are a follow-up to the reading passage through which students are introduced to the idioms of the chapter. Through comprehension, inference, and main idea questions, students learn to make hypotheses about the meaning of the idioms in context.

Meaning Exercises

The Figure It Out exercise helps students grasp the precise meaning of each idiom. Each line is part of a story, so the context builds from sentence to sentence. What Does It Go With? helps students develop an awareness of which subjects and objects go with each idiom. Look It Up allows the student to use some of the information learned earlier in the chapter, and introduces new information, such as where the stress falls in the idiom and what grammatical and stylistic traits characterize that idiom. Note: If the reading selection is too difficult for a particular class, start with the meaning exercises and then go to the reading selection and reading exercises.

Grammar Exercises

Fill It In: Prepositions and Particles is an exercise that draws students' attention to the prepositions and particles that co-occur with verbs to form idioms. This exercise is also a story, which provides learners with another example of the idioms in context. This exercise is on the cassette, so students can check their answers by listening to the tape. Note: This exercise could also be used as a pretest to determine if the learners know any of the idioms before they work on a chapter. Fill It In: Object Pronouns is an exercise that helps learners recognize that the pronoun object goes between the verb and the particle, but after the preposition in the case of a verb-preposition combination. Note: This exercise does not include idioms that don't take a pronoun object (some take only a gerund) or any object at all.

Listening Comprehension Exercise

Listen In provides an opportunity for students to hear the idioms presented in new situations in a voice other than the teacher's or other

students'. This exercise helps students develop confidence in their ability to understand the precise meaning of spoken utterances.

Writing Exercise

In *Finish It Up*, students complete a diary entry that has been started for them, requiring learners to generate their own sentences with idioms. This exercise gives the learners a chance to demonstrate their knowledge of the meaning of the idioms, the subjects and objects that go with the idioms, the position of pronoun objects, and any particular grammatical or stylistic characteristics of the idioms. When writing, students have time to attend to all of these details and to edit their work. *Note:* The photograph that opens each chapter may be used for additional writing practice.

Conversation Activities

Act It Out helps students create their own sentences with idioms in the contexts provided. For variety, different groups may act out different situations, or groups may want to invent their own settings. *Talk It Over* gets the students out of their chairs to interact with their classmates. The exercise requires comprehension of the idioms and, like the warm-up exercise, encourages students to learn more about each other. Some chapters contain additional *Talk It Over* activities that generate discussion about the theme of the chapter. *Note:* The photograph that opens each chapter may also be used for additional conversation practice.

Review Sections

Review I: *Mix Them Up* gives learners additional practice with the thirty-one idioms in Chapters 1 through 5. Review II: *What's Up?* brings together all the idioms in Chapters 1 through 10.

What's Up? contains many exercises, and it isn't necessary to do every one in class. Students can work on the multiple-choice exercises at home and do the more communicative exercises (that is, *Warm-Up*, *Act It Out*, and *Talk It Over*) in class. Of course, if the tape is used, exercises requiring the tape should be done in class [*Fill It In: Prepositions and Particles*, and *Listen In*].

If there isn't sufficient time to cover all the exercises, choose those that are appropriate to the level of the class and the subject matter to be stressed in the course (for example, listening or conversation). If students want to cover all the exercises, they can do them on their own and check their answers in the Answer Key in the appendix. The pages are perforated, so the Answer Key can be removed if it proves to be too much of a temptation during the learning process.

TYPES OF IDIOMS

This book presents four types of verbal idioms:

Idiom	<u>Example</u>
1. verb + particle (also called "phrasal verbs" or "two-word verbs")	/ / / / bring up, catch on
2. verb + preposition (also called "prepositional verbs")	/ / stick to , become of
3. verb + particle + preposition (also called "three-word verbs")	/ / / / sign up for, drop out of
4. complex combinations, e.g.: verb + preposition + noun + preposition	/ / get in touch with
verb + article + noun + preposition	/ / make an impression on

Notice that the stress patterns differ. In general, particles (also called "adverbs" or "adverbial particles") are stressed, but prepositions are unstressed unless the preposition has more than one syllable. For example, "turn into" has stress on the first syllable of the preposition "into."

Another difference involves the position of objects. In transitive verb + particle combinations, the noun object can go between the verb and the particle (for example, "bring the children up") or after the particle ("bring up the children"). But if a pronoun object is used, it must go between the verb and the particle ("bring them up"). In all other verbal idioms, the object goes after the preposition, whether it's a noun or a pronoun (for example, "stick to it," "sign up for a course," "get in touch with her," "make an impression on them").

By definition, the meaning of an idiom cannot be derived from the individual meanings of its parts. There are varying degrees of idiomaticity, however: from those that are close to literal (such as "win out") to those that are highly idiomatic (such as "break out"). This book contains all types. Some are actually not idiomatic at all, but are included because the words that make up the combination have such a strong tendency to occur together (such as "plan on" and "vote for"). In other words, the selection of idioms in *What's Up?* tends to be more inclusive than exclusive.

WARM-UP EXERCISE

Which sports do you like to watch?

Which sports do you like to participate in?

If you don't like sports, which other activities do you like, for example, dancing, reading?

Share your favorite sports or other activities with the class.

READING SELECTION

DIRECTIONS: Read the following story silently. Then do the reading exercises that follow.

Go for It

Mark Spitz said he would win six gold medals in swimming events¹ at the 1968 Olympic Games in Mexico City. But it wasn't that easy; Spitz was **competing against** some of the best athletes² in the world. He won only two gold medals, not six, but those two showed that he **was good at** the sport.

The people who **rooted for** Spitz at the '68 Games saw him again four years later. In the 1972 Olympic Games in Munich, Spitz decided to **go for** the gold once more. Again, he **stood out**. He won not six, but seven, gold medals: three as a member of U.S. teams and four in individual events. This made Mark Spitz the first athlete to win seven gold medals at the same Games.

What is the five-ounce medal worth? The "gold" medal is really 92 percent silver, so it is not worth very much money. But because of his Olympic success, Spitz appeared in many television commercials, so his gold medals were worth several million dollars.

1. Contests in a program.
2. People trained in sports requiring strength, skill, and speed.

I. READING EXERCISES

A. Get the Picture? Comprehension

DIRECTIONS: These questions are based on the story you just read. Write "True" or "False" after each statement.

1. In the Olympics, Spitz had to beat some of the best swimmers in the world. **True**
2. Spitz ~~was~~ just an average swimmer in the 1968 Olympics.
3. Nobody wanted Spitz to win in the '68 Olympic Games.
4. In 1972, Spitz **wanted** to win more gold medals.
5. In the 1972 Olympics, Spitz's performance was much better than the other swimmers'.

B. Get the Picture? Inferences

DIRECTIONS: An inference is something that is not stated directly, but is implied. Write "True" or "False" after each inference.

1. An athlete can be in the Olympic Games only one time. _____
2. The first-place medal is gold on the outside, but silver inside.
3. Companies pay Olympic winners a lot of money to advertise their products.

C. Get the Picture? Main Idea

DIRECTIONS: Mark the one statement that represents the main idea of the story.

1. () Mark Spitz, the first athlete to win seven gold medals at the

Sports

same Olympic Games, made a lot of money because of his Olympic success.

2. () Mark Spitz was wrong about the 1968 Olympic Games in Mexico City. He won two gold medals, but he said he would win six. So he tried again in 1972.
3. () Mark Spitz was a good swimmer.

II. MEANING EXERCISES

A. Figure It Out

DIRECTIONS: Mark the meaning of the idiom underlined in each sentence.

1. Jimmy Connors was so good at tennis that he played in all the big tournaments.
 - a. () was nice during
 - b. () tried hard at
 - c. (**x**) had much talent for
2. Connors competed against some of the best players in the world, for example, Bjorn Borg, John McEnroe, and Ivan Lendl.
 - a. () tried to beat in competition
 - b. () didn't like during competition
 - c. () was able to beat
3. Connors was a fine tennis player and had a good sense of humor, so when he played a match, a lot of people would root for him.
 - a. () watch constantly
 - b. () express support for, cheer for
 - c. () laugh at
4. Every time Connors hit the ball, he seemed to go for a winning shot.
 - a. try not to get
 - b. try for
 - c. get

Set of 100

5. Jimmy Connors stands out as one of the great tennis players of all time.
- wants to be remembered
 - is as tall
 - is noticeable

B. What Does It Go With?

DIRECTIONS: Two of the three choices after each sentence can be correctly used with the idiom. Mark the *two* correct answers.

1. At the U.S. Open Tennis Tournament, fine tennis players compete against _____
- the best players from all over the world
 - each other
 - tennis
- Hint: The object must be a person.
2. Linda is going to major in physics because she's good at _____
- school
 - science
 - math
- Hint: The object must be a specific subject, sport, or skill.
3. Which _____ are you rooting for?
- sport
 - soccer team
 - runner
- Hint: The object must be a person or team.
4. Cynthia doesn't want to be an average runner; she always goes for _____
- first place
 - the finish line
 - a gold medal
- Hint: The object must be something that represents success.

Sports

5. That _____ really stands out, so the judges gave her high scores.

- a. () skater
- b. () runner
- c. () average gymnast

Hint: The subject cannot be ordinary, because this contradicts the meaning of the idiom.

C. Look It Up

DIRECTIONS: Create your own minidictionary. For each idiom, write the meaning, an appropriate subject, a direct object or *object of the preposition* where indicated, and an example sentence. If you need help, refer to the other exercises in this section. Notice the stress (/) for each idiom, the position of the pronoun object [], and any special grammar or stylistic notes.

When you have created your minidictionary for each chapter, you can look an idiom up whenever you need to.

1. compete against []

Meaning: **try to beat in competition**

Subject: **Bob's team**

Object of preposition: **the state champions**

Example sentence: **Bob's team is competing against the state champions.**

2. be good at []

Meaning: .

Subject: ____

Object of preposition:

Example sentence: ____

3. root for []

Meaning: _____

Stylistic notes: informal

Subject: _____

Object of preposition:

Example sentence: ____

4. go for []
 Meaning:
 Grammar note: object is often "it"
 Stylistic note: informal
 Subject: _____
 Object of preposition:
 Example sentence: ____
5. stand out
 Meaning:
 Subject: _
 Example sentence:

III. GRAMMAR EXERCISES

A. Fill It In: Prepositions and Particles

DIRECTIONS: Fill in the blanks with the correct prepositions or particles. Then play the tape and check your answers.

Tai and Randy Gardner were good **at** figure skating. In fact, they stood **out** internationally in the world of ice skating.

In 1980, they decided to go **for** a Gold Medal in the Olympics. This wasn't going to be easy, because they would have to compete **with** the Russians, Rodnina and Zaitzev. But Tai

4

and Randy were so popular, everybody in the United States seemed to be rooting **for** them.

5

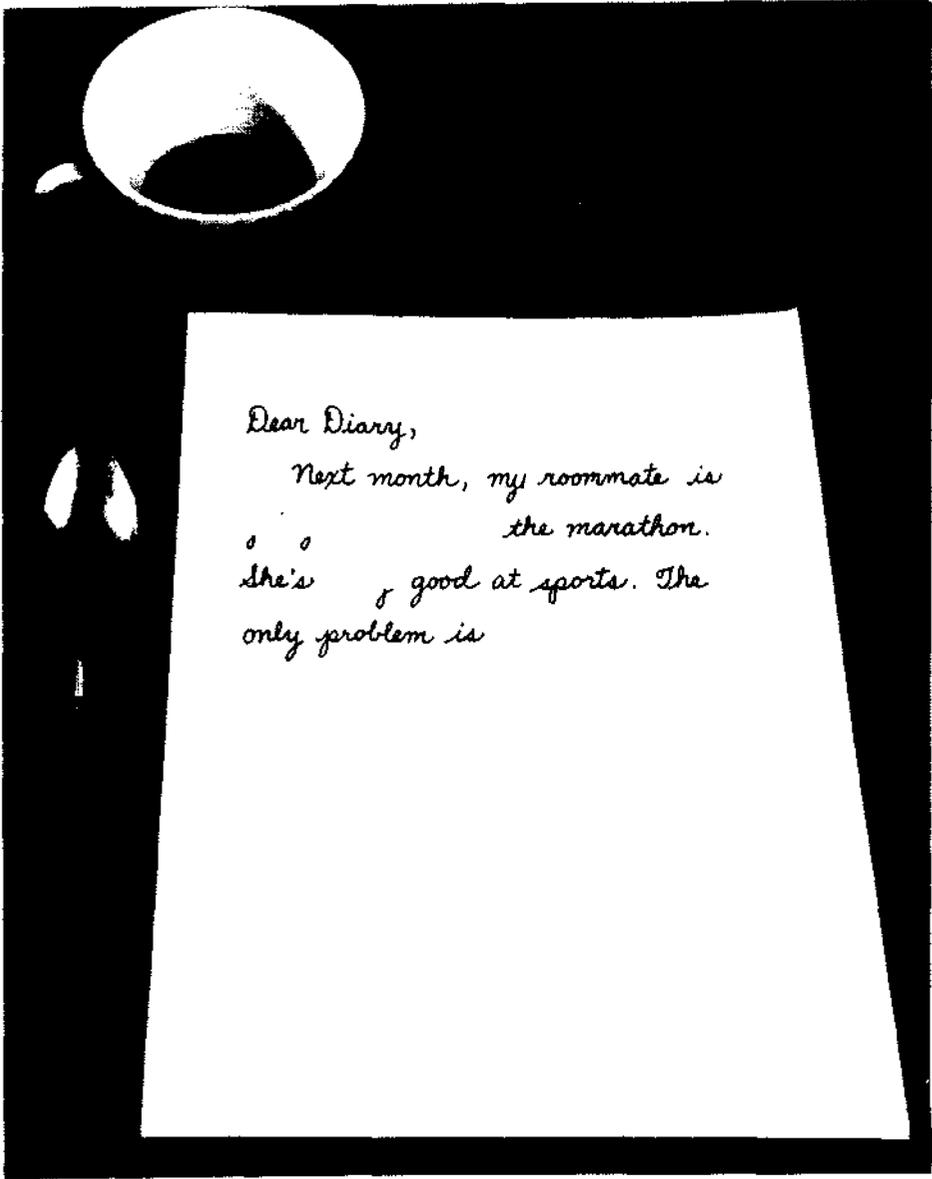

Just before the Olympic Games, Randy fell and the skaters couldn't compete. What a disappointment!

3. a. Elaine is not going to enter the competition next year because she doesn't think she can win.
b. Elaine is sure she's going to win this year.
c. Elaine will try to win next year.
4. a. Because Walter had been such a good manager, many employees expected him to become president.
b. Walter was president of the company.
c. Walter wasn't a very good manager.
5. a. Maria doesn't like politics.
b. Maria has always had the talent for politics.
c. When Maria was a child, her parents were politicians.

V. WRITING EXERCISE

A. Finish It Up

DIRECTIONS: Finish this entry in your diary. Use as many idioms as you can.

Dear Diary,

Next month, my roommate is
going to run the marathon.
She's really good at sports. The
only problem is

VI. CONVERSATION ACTIVITIES

A. Act It Out

DIRECTIONS: Read each of the following situations and act it out. Use as many idioms as possible. Work with a partner.

be good at	root for
compete against	stand out
go for	

- Your friend is a secretary in a busy advertising agency. Her boss, the office manager, is leaving the company. She wants the job but is afraid to say so. Give her advice and encouragement. For example, say, "Nancy, when Mr. **Lipton** leaves the company, you should go for his job."
- You're the coach of a college basketball team. Your team has already lost five out of five games this season. Give the team advice before the next game.
- Choose a sport you like. Pretend you're a television sportscaster and interview one particular player.

B. Talk It Over

Move around the room and find a classmate who . . .

Write his or her name here.

- always roots for athletes from his or her country.
- is good at wind surfing.
- hates to compete against anybody.
- always goes for first place.
- really stood out in school.

-2-

As you can see,
we all grew up
wearing sunglasses.

WARM-UP EXERCISE

Find all the people in the class who have the same size family as you. For example, if there are three **children** in your family, find all those who have three children in their families.

If you are the oldest child, find all those who are the oldest in their families. Use these categories:

- the oldest child
- the middle child
- one of the middle children
- the youngest child
- an only child

Show the class a picture of yourself as a child. If possible, the picture should include other family members. Describe the picture.

READING SELECTION

DIRECTIONS: Read the following story silently. Then do the reading exercises that follow.

Growing Up

On June 21, 1983, everybody was crying in the delivery room¹ of the hospital, even the doctors. That day, **Pam** Peizer **gave birth to** six babies.

Unfortunately, one baby died, but four boys and one girl lived. Soon, everyone heard the news about the five babies, the Peizer quintuplets.

When the babies came home from the hospital, it wasn't easy to **tell** them **apart**. The Peizers would just count them to be sure all five babies were there.

At first, both Pam and Danny stayed home to **take care of** the quintuplets. Later, while the children were **growing up**, Danny stayed home with them while his wife went to work. The Peizers also had two baby nurses, and often the grandparents helped with the babysitting. But even with a lot of help, it's not easy to **bring up** five children, especially when they're all the same age.

It wasn't an accident that Pam Peizer had so many babies. She had quintuplets because she took a special drug called "pergeno." Although there are fertility drugs like the one Pam Peizer took, it's still unusual to have quintuplets. Fewer than fifty families in the world have quintuplets.

1. The room in a hospital where babies are born.

I. READING EXERCISES**A. Get the Picture? Comprehension**

DIRECTIONS: These questions are based on the story you just read. Write "True" or "False" after each statement.

1. Six babies were born to **Pam** Peizer on June 21, 1983. True
2. The quintuplets looked very similar.
3. In the beginning, Pam was the only babysitter.
4. Danny stayed home with the children only when they were very young.
5. Because Danny had a lot of help, it was easy to raise the children.

B. Get the Picture? Inferences

DIRECTIONS: An inference is something that is not stated directly, but is implied. Write "True" or "False" after each inference.

1. Pam Peizer thought she was going to have more than one baby. _____
2. Pam and Danny Peizer are a traditional couple.
3. The children's grandparents live near the Peizers.

C. Get the Picture? Main Idea

DIRECTIONS: Mark the one statement that represents the main idea of the story.

1. () Danny Peizer is a good father.
2. () Parents of large families should have babysitters to help them with their children.

3. () Something unusual happened on June 21, 1983: Pam Peizer had quintuplets.

II. MEANING EXERCISES

A. Figure It Out

DIRECTIONS: Mark the meaning of the idiom underlined in each sentence.

1. Laurette just gave birth to fraternal twins.
 - a. () helped deliver
 - b. (**x**) produced, was delivered of
 - c. () was born as one of two

2. Because the babies are fraternal twins, they look different. If they were identical twins, it wouldn't be so easy to tell them apart.
 - a. () be able to see the difference between them
 - b. () keep them in separate places
 - c. () talk to them separately

3. The twins are so cute that everyone wants to take care of them.
 - a. () look at
 - b. () take home, keep permanently
 - c. () take responsibility for, watch

4. Instead of getting a baby nurse, Laurette wants to bring up the children herself.
 - a. () raise, educate
 - b. () feed, nourish
 - c. () carry

5. Laurette wants to see them grow up.
 - a. () crawl around
 - b. () eat their food
 - c. () become older and bigger

B. What Does It Go With?

DIRECTIONS: Two of the three choices after each sentence can be correctly used with the idiom. Mark the *two* correct answers.

1. Fred's wife just gave birth to_____

- a. () a baby

READING SELECTION

DIRECTIONS: Read the following story silently. Then do the reading exercises that follow.

Get in Touch

Jim Peterson was planning a trip to Italy. The problem was that he didn't know Italian. Two months before his trip, he **called up** Phone Lab, a language school,¹ and said he wanted to study Italian. This is what the school told him about its language courses:

Every day at a certain time, your Italian teacher will **get in touch with** you by phone, at work or at home. If you're **on the phone** at that time, you have to **hang** up so your teacher can **get through**. Each class is thirty minutes long. Don't worry, Phone Lab pays the telephone bill.

Once a month, there's a party with your teacher and the other students studying Italian. After you've met the other students, you can **keep in touch with** them by phone, **too**.

Jim liked this idea and took an eight-week telephone course. When he arrived in Italy, he had no problem with the language. Jim had married his Italian teacher the day before the trip, so she was on the trip with him.

Phone Lab doesn't promise everyone the same success as Jim, but it does promise a good language course by phone.

WARM-UP EXERCISE

Everyone learns to speak his or her own language, but not everyone learns to read that language. What three things could you do to help people learn to read?

1. _____

2. _____

3. _____

READING SELECTION

DIRECTIONS: Read the following story silently. Then do the reading exercises that follow.

Dropping Out

A personal problem has become a national problem, and it's getting bigger and bigger. It's not drugs, and it's not drunk drivers. The problem is illiteracy.¹

About 26 million Americans are functionally illiterate.¹ In other words, they can't **fill out** job applications because they can't read the forms, and they can't **figure out** the directions on food packages or understand simple newspaper articles.

Many illiterates² aren't **working on** their problem because they're too embarrassed about it. They don't want their friends or their children to know that they can't read.

But some people are doing something about this national problem. The Coalition for Literacy, a group of eleven literacy organizations that includes Literacy Volunteers³ of America, Inc., and Laubach Literacy Action, has **focused on** the problem and gives help with reading across the country.

Illiterates are **signing up for** free tutoring⁴ in almost every state, but some people think the illiteracy problem will never end. While volunteers are teaching adults to read, children with reading problems are **dropping out of** school because they can't **keep up with** their classmates. And, although it is hard to believe, some high schools give diplomas to functional illiterates. Unfortunately, the children with reading problems today will be illiterate adults tomorrow.

1. The inability to read or write.
2. People unable to read or write.
3. Volunteers are people who give their free time to help others.
4. A class situation in which one teacher works with one student.

Polish It Off

Are you the type of person who **gulps down** every meal¹ in two minutes? Do you eat candy to **tide** you **over** between lunch and dinner? Do you **polish off** a big bag of potato chips by yourself? Would you like to **do without** sugar in your coffee, but can't? If you do any or all of these things, you need help from one of the many available diet products: diet pills, diet powders, diet foods, or diet books.

If you think Americans **are obsessed with** dieting, you're probably right. About 70 million Americans are overweight,² and more than half of them are trying to lose.

Many overweight people take diet pills. Taking diet pills controls your appetite, so you eat less. But are diet pills safe? Some researchers³ say "no."

Another way you can lose weight is to take diet powders.⁴ Diet powders can be **mixed with** water or skim milk.⁵ They're good for you because they have vitamins⁶ and minerals⁷ and other substances the body needs. They help you lose weight because they have a limited number of calories. You can drink the powder mixture instead of eating a meal. This is an easy way to have a healthy meal while limiting the number of calories you **take in**.

But some people aren't satisfied unless they eat a real meal. Such people can buy low-salt, low-fat, **frozen** foods that look and taste like regular meals, but have a limited number of calories.

And then there are the diet books that tell you what to eat and what not to eat and list how many calories each food has. With the diet pills, the diet powders, the diet foods, and the diet books, dieting is becoming very complicated. But everybody knows how to lose weight: just eat less, exercise more, and **stick to** it!

READING SELECTION

DIRECTIONS: Read the following story silently. Then do the reading exercises that follow.

Don't Give Up

It sounds like a dream. It must be a dream: An international language that has only sixteen grammar rules and no exceptions, words spelled the way they're pronounced, and regular stress. Well, it's not a dream. There is such a language. It's called "Esperanto." And the best thing about it is that it can be learned in only three months.

In 1887, Ludovic Zamenhof, a Polish eye doctor, developed Esperanto. He wanted to make it a second language for people all over the world.

Dr. Zamenhof wrote several books under the pen name¹ "Doktoro Esperanto." He translated the Old Testament and some of the works of great writers like Shakespeare, Moliere, and Gogol into Esperanto.

Today, more than 30,000 books (mostly translations) have been published² in Esperanto. The organization of Esperanto supporters, *Universala Esperanto-Asocio*, has members in over eighty countries. These Esperantists have been **keeping up** the work of Zamenhof, but the language still hasn't **caught on**.

Esperantists, however, are hopeful. They think they **stand a chance of** persuading the United Nations (U.N.) to make Esperanto its official language. The U.N. has already **turned down** their proposal, but the Esperantists will not give **up**. They believe that, some day, they will **win out**.

Will the Esperantists ever **pull it off**? Probably not. The language **is up against** some real competition. The biggest competitor has many more grammar rules than sixteen; it has many exceptions to the rules; its words are spelled very differently from the way they're pronounced; and stress is not very regular. Also, anyone reading this story knows that it certainly cannot be learned in three months. The language? *La angla*,³ of course!

1. A name used by an author instead of the author's true name.

2. Printed to sell to the public.

3. "La angla" is Esperanto for "English."

I. READING EXERCISES**A. Get the Picture? Comprehension**

DIRECTIONS: The following questions are based on the story you just read. Write "True" or "False" after each statement.

1. Members of *Universala Esperanto-Asocio* continue the work Zamenhof started. **True**
2. Esperanto has become very popular.
3. The Esperantists still think there's a possibility of making Esperanto the official language of the U.N.
4. The United Nations said "no" to the Esperantists' proposal to make Esperanto the official language of the U.N.
5. The Esperantists stopped trying to make Esperanto the official language of the U.N.
6. Esperantists think they will succeed someday.
7. Esperanto doesn't have any competition.

B. Get the Picture? Inferences

DIRECTIONS: An inference is something that is not stated directly, but is implied. Write "True" or "False" after each inference.

WARM-UP EXERCISES

Describe the ideal politician—for example, mayor, governor, or president. Write three adjectives below.

The ideal politician is _____

Share your answers with the class.

If you were a politician, what would you change in the United States?

READING SELECTION

DIRECTIONS: Read the following story silently. Then do the reading exercises that follow.

Vote for Me

In 1984, Geraldine Ferraro of Queens, New York, became the first woman to **run for** vice president of the United States. Before the election,¹ Ferraro traveled across the country with Walter Mondale, who hoped to become president. Mondale and Ferraro asked Americans in every state to **vote for** them.

But on January 20, 1985, the Mondale – Ferraro team² wasn't **sworn in**. The American voters didn't **put** a woman **into power**. In fact, only Mondale's home state of Minnesota and the District of Columbia voted for the Democrats, so the Republicans **took over** the White House once again.

What happened? Did the voters **disapprove of** Mondale or **were** they **against** Ferraro? Did they have questions about Ferraro's family's money, her husband's business connections, or her position supporting abortion?³ Or were President Reagan and Vice President Bush just too popular?

No one really knows why Mondale and Ferraro didn't win, but we do know that by trying to become vice president, Ferraro **paved the way for** other women in national politics.

1. Opportunity to support a candidate by vote.
2. People on the same side in a contest.
3. Stopping a pregnancy by forcing a fetus from the mother's womb.

I. READING EXERCISES**A. Get the Picture? Comprehension**

READING SELECTION

DIRECTIONS: Read the following story silently. Then do the reading exercises that follow.

Make a Name for Yourself

Ernest Hemingway was born in Oak Park, Illinois, in 1899. After finishing high school, he became a newspaper reporter for the Kansas City Star. By the time he was in his mid-20s, he had published his short stories. Then, he **got off to a good start** as a novelist with the publication of *The Sun Also Rises*. The young writer **kept on** writing and soon published *A Farewell to Arms*, which many readers said was his best work.

Hemingway **made a name for himself** not only as a writer but also as an adventurer.¹ He **took an interest in** big game² hunting and fishing, and he enjoyed watching bullfights. He **made** use of these experiences in his books.

When Hemingway was young, he was disappointed in love. He was **planning on** marrying a nurse he had met in World War I, but she decided to marry an Italian duke³ instead. Hemingway was heartbroken. Later, he did get married—four times, in fact. Such events from his own life were often published in newspapers.

In 1921 Hemingway went to Paris to work as a foreign correspondent⁴ for the Toronto Star, a Canadian newspaper. When he was there, other writers like F. Scott Fitzgerald, Gertrude Stein, and Ezra Pound **made an impression on** him.

In 1940 Hemingway's most popular novel, *For Whom the Bell Tolls*, was published. In 1953 he won the Pulitzer Prize in fiction for his novel *The Old Man and the Sea*. One year later, he won the Nobel Prize for literature. Ernest Hemingway **was destined for** greatness.

In his later years, Hemingway lived in Cuba and wrote about the country, but Castro's revolution forced him to return to the United States in 1960. The following year, his life ended with the drama of one of his novels: He killed himself with a shotgun.

1. A person who has exciting or dangerous experiences.

READING SELECTION

DIRECTIONS: Read the following story silently. Then do the reading exercises that follow.

Fight It Off

In the fourteenth century, an epidemic¹ of bubonic plague, a terrible disease, killed 25 million people in Europe. When the epidemic **broke out**, people called it the "Black Death." It spread when fleas² carrying the disease **came in contact with** rats.³ When the fleas bit the rats, the disease went into the rats' bloodstreams. When the rats died, the fleas spread the disease to humans. People who got the disease **threw up**, and parts of their bodies became swollen.⁴

In the twentieth century, an epidemic of another plague, called AIDS (acquired immune deficiency syndrome), broke out. Like bubonic plague, AIDS is spread through the bloodstream.

In healthy people, the immune system **protects** the body **from** disease. AIDS causes the immune system to **break down**. Without the help of the immune system, the AIDS victim **suffers from** one sickness after another, including unusual types of cancer⁵ and pneumonia.⁶

In 1981, the first patient⁷ was **treated for** AIDS. In the following years, thousands **died** of this twentieth-century plague.

1. The spreading of a contagious disease.
2. A small bloodsucking insect that jumps from place to place.
3. A long-tailed rodent that is larger than a mouse.
4. Bigger, increased in size.

READING SELECTION

DIRECTIONS: Read the following story silently. Then do the reading exercises that follow.

Live It Up

In the late 1960s and early 1970s, hippies **were wrapped up in** demonstrations¹ and drugs. Many hippies (or flower children, as they were called) left the cities to plant gardens in the country. The only clothes they wore were jeans and T-shirts. Hippies didn't want money or power; peace and love were all they **believed in**.

What **became** of the hippies? In the 1980s, many of them **turned into** yuppies (young, urban professionals). Yuppies loved big cities, where they changed old neighborhoods² into fashionable sections.

Looking good was important, so yuppies **worked out** in a health club, and spent a lot of money on their hair and clothes. After buying everything they needed to cook at home, they **ate out** most of the time. Yuppies really **lived it up**.

If looking good was important to yuppies, being successful at work was very important. Yuppies **were devoted to** making money. Many worked and **had** careers **on the side**. This extra business was often real estate.³

What's going to happen to the baby-boom generation⁴ in the future? Some say they will develop another new lifestyle. Others say they will **settle down**, have children, and grow old, just like every other generation.

1. A public expression of opinion.
2. Areas, communities.
3. Land and the buildings on it.

DIRECTIONS; Rewrite the following story using as many of the idioms listed on page 159 as possible.

Betty lived in a small town when she was young. When she was about ten, she started to have trouble in school. She couldn't learn as fast as the other children. After spending hours trying to do her homework, she would stop trying. It was impossible for her. She would get so upset about her homework that she would become sick.

Sometimes she would telephone a classmate for help; but after trying to help Betty, they would get tired and end the conversation. Betty had a problem that millions of other people have: illiteracy.

Finally, her parents found a special literacy program for her, and she registered for literacy training. When she became an adult, she worked as a literacy volunteer, and was very involved in the literacy movement.

Betty was brought up in a small town.

VI. LOOK INTO THE FUTURE

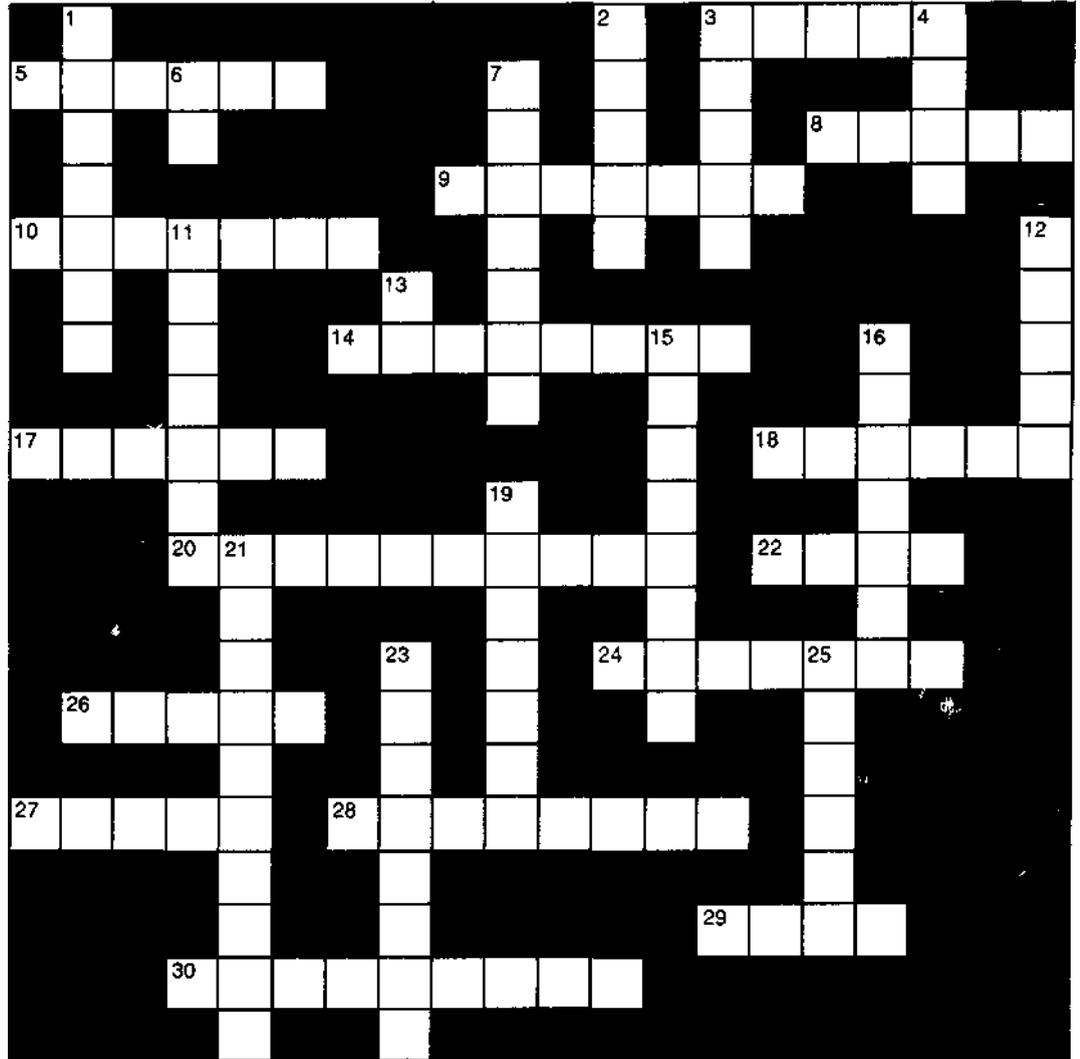

DIRECTIONS; You're going to write messages for fortune cookies. Cut or tear up a piece of paper and write two fortunes using idioms you've learned. Write something positive! Put all the fortunes in a pile and have each member of the class choose two. If you wish, read the fortunes out loud to the class.

Examples:

Soon you will come in contact with a person
who will influence your life.

The next time you are treated for a medical problem,
you will fall in love with your doctor.

Being single is fun,
but it's time to settle down.

This text helps intermediate-level ESL students understand and use 87 high-frequency phrasal verbs and verbal idioms. The idioms are presented in meaningful contexts throughout each chapter, and a variety of exercises and activities provides extensive practice with the idioms in listening, speaking, reading, and writing.

Appropriate for special classes in idioms, vocabulary, or listening comprehension, or as an ancillary text for grammar, conversation, listening, reading, or writing courses.

- focuses on high-frequency verbal idioms (e.g., grow up, get in touch with, sign up for, turn down, and take over)
- each chapter introduces 6 to 12 idioms related to a specific topic (e.g., sports, education, politics, and lifestyles)
 - idioms are introduced in reading selections about contemporary topics (e.g., the Olympics, illiteracy, dieting, lifestyles)
- re-introduces the idioms in meaningful contexts in exercises and follow-up activities, some of which draw attention to the syntactic and semantic properties of the idioms. Each chapter contains:
 - warm-up exercises
 - reading exercises (comprehension, inference, main idea)
 - meaning exercises (the subjects and objects that are appropriate to each idiom)
 - grammar exercises (prepositions and participles: the position of object pronouns)
 - listening comprehension exercises (the correct placement of stress for each idiom)
 - writing exercises
 - conversation activities (acting it out: talk it over)
- includes two review sections that provide additional practice and allow for the integration of idioms from different chapters
- provides an answer key
- features stimulating photographs, some funny, others intriguing, all designed to generate discussion

CONTENTS:

1. Sports. 2. Family. 3. Communication. 4. Education. 5. Food. Review I: Mix Them Up. 6. Persistence. 7. Politics. 8. Success. 9. Sickness. 10. Lifestyles. Review II: What's Up?
